On pages 4, 5, and 7 of this article, the authors incorrectly stated that the measure of political partisan impact on disaster crew deployments was the municipal level 2016 electoral victory for the Governor of Puerto Rico. However, the coefficients showed in our statistical models correspond to the municipal-level electoral victory of mayors from the

ruling Partido Nuevo Progresista (PNP). The authors apologize for this error. The authors re-ran their model with the municipal level incumbent Governor's 2016 electoral victory and confirmed that the impact of partisan politics remains consistent with the results discussed in the original text.
